Therapy Solutions

Stylish on the Outside. Smart on the Inside.

Stylish on the Outside. Smart on the Inside.

The F&P ICON™ has been designed from the outside-in to answer the patient's strong call for a compact, stylish CPAP that blends seamlessly into any bedroom environment.

This new design, combined with the full range of Fisher & Paykel Healthcare's clinical technologies, means the healthcare professional can feel more confident in an effective therapy solution that also meets business needs.

The F&P ICON™ is a comfortable, visually appealing system, designed to enhance patient adaptation to CPAP therapy.

This represents a unique opportunity for the healthcare provider to improve patient care and enjoy the long-term effects of a smooth-running business. The F&P ICON™ family is made up of three models. The Auto provides flexibility in pressure modes, while the Premo meets demand for fixed pressure with full efficacy reporting and the Novo is a standard CPAP with compliance reporting.

FOCUS ON FEATURES

F&P ICON™ Auto

The Auto combines all features and technologies into one unit to provide the most flexibility for patient management and inventory control.

SensAwake™

Responsive to waking moments.

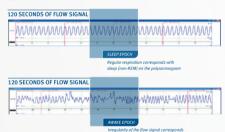

Patients commonly arouse from sleep which can sometimes lead to a full awakening. During these awake states, many patients are intolerant of the delivered pressure¹ which may force them to prematurely abandon CPAP therapy for the night. It is therefore important to provide as much comfort as possible during these awake states to help facilitate the return to sleep.

SensAwake[™] does this by searching for a pattern of irregular breathing which occurs at the transition from sleep to awake, as shown in the flow signal to the right. SensAwake $^{\text{TM}}$ senses this irregularity in flow and promptly reduces the pressure to aid the transition back to sleep.²

Auto-adjusting pressure: more flexibility for short or long-term treatment needs

The flow-based auto-adjusting algorithm responds to flow limitation, hypopnea and apnea. The pressure response is dependent on the type of event to personalize pressure needs during sleep.

F&P ICON™ Premo

The Premo is a premium fixed-pressure CPAP with a range of cost effective options to communicate efficacy data.

ThermoSmart™

More humidity. Less discomfort.

ThermoSmart™ Technology is at the forefront of Fisher & Paykel Healthcare's humidification philosophy, and is compatible with each F&P ICON™ model. The advanced humidification algorithm and heated breathing tube work together to provide optimal humidity without condensation.

Time and again, studies have shown that patients will benefit from high levels of humidity³ for improved comfort⁴ and a clinically proven better night's sleep.5

F&P ICON™ Novo

The Novo is a standard fixed-pressure CPAP for those patients who require basic compliance monitoring. Features such as the SmartDial™, clock, alarm and AlarmTunes™ also enhance the user experience.

The SmartDial™ works on a simple Press, Turn, Press principle. Each setting in the Menu System is outlined below for your quick reference.

Patie	nt Menu			
	Ramp: Once therapy has started, press the SmartDial™ and hold for 3 seconds to activate.	<u>w</u>	Sleep Data: Several compliance and efficacy statistics can be viewed in this setting. This data can be used for quick telephone compliance reporting.	
ı	Humidity: Can be adjusted between 0 and 7. To access humidity Boost, press and hold the SmartDial™ for 3 seconds and select low, medium or high.	SENSAWAKE	SensAwake™ On/Off: SensAwake™ can be deactivated in the Auto model.	
ф	Alarm On/Off: Use this setting to select either Alarm bell or AlarmTunes [™] for a personalized wake-up call.	Ģ	model di	Preferences Altitude Adjustment: The Novo model displays the altitude symbol for Altitude Adjustment.
Ф ф	Alarm Time: Sets the alarm time in hours, then minutes.		ECO ECO Mod	le: This allows the operate on reduced
♦	Alarm Volume: Volume of the Alarm can be adjusted by turning the SmartDial™.		power (75 W) for use on long-haul air flights, camping use with battery power.	
4	Clock Time: The Clock Time can be adjusted to display the hour, minutes, 12-hour or 24-hour time.		Pressure display o	Pressure: The Display setting provides two options for the Home Fime or Actual Pressure.
*	Brightness: The brightness of the display screen can be adjusted by turning the SmartDial™ to the desired level. The Active Brightness (brightness of the display when the Menu System is in use) can also be adjusted by pressing and holding the SmartDial™ for 3 seconds while in the Brightness setting.		fault diag displays symbol f Screen th setting, r displayed	de: This is a convenient gnosis feature which error codes. If this lashes in the Home nen navigate to this record the number d and contact your re provider.

Clin	ician Menu
G	Service Setting: This setting provides information including the current software version, error codes and run time (hours) of the device.
MENU	Menu Level: Some of the features available to the patient to view or adjust in the Patient Menu can be restricted in this setting. Level 1 provides limited patient access and excludes efficacy data. Level 2 provides advanced functionality for the patient, including access to view efficacy data.
CPAP OR AUTO	Pressure Mode: Pressure delivery can be changed from fixed to autoadjusting in models with this feature.
AUTO Min/Max	Set Pressure: Prescribed pressure can be set for CPAP, or Minimum and Maximum pressures for auto-adjusting CPAP.
Ф	Time-zone: To achieve accurate nightly averages for LCD compliance reporting the device needs to know where it is in the world. This is achieved by specifying the patient's time-zone.

InfoSmart[™] Technologies

Retrieving quality sleep data in a timely and efficient manner is crucial to understand patient needs and influence therapy outcomes. InfoSmart™ Technologies provide a range of options to best suit your business practice.

InfoSmartTM Technologies More communication. More results.

Data Communication

- InfoSend[™] View: The patient can relay sleep data from the display screen of the device, which can then be verified using the F&P InfoSmart[™] software
- SmartStick™ (Net): The functionality of the SmartStick™ and SmartStick™ Net have been combined into one, so the choice of data retrieval becomes even more simple and cost effective. The physical SmartStick™ can be sent via the mail for data download, or the sleep data can be sent electronically via the web.

Data Reporting

Treatment compliance and efficacy reporting is a key factor for comprehensive patient follow-up and thus therapy outcomes. F&P InfoSmart™ software produces comprehensive charting and reporting of patient data including:

- A choice of 30, 60 or 90 days of summary data
- · 7 days of detailed data
- Cumulative summary data from first use.

More family. More time.

The F&P ICON™ with its unique technologies is likely to free up more time for the healthcare provider to enjoy life while benefiting from a smooth-running business.

Fisher & Paykel Healthcare offers a full-service solution:

- Quiet, comfortable and reliable therapy
- Less inventory with a fully integrated system
- More options available to monitor and report on patient compliance
- Enhance patient acceptance with added-value features
- Patient support through www.vigor8.com.
